No. 1 (July)

Editorial:

Circulation: The Next Five Years 1
Elliot Rapaport

The George Lyman Duff Memorial Lecture:

Life Styles, Major Risk Factors, Proof and Public Policy 3
Jeremiah Stamler

Current Topics:

The Problem of Valve Prosthesis-Patient Mismatch 20
Shahbudin H. Rahimtoola

Hemodynamically Significant Anomalies of the Coronary Arteries — Angiographic Aspects 25
David C. Levin, Kenneth E. Fellows, and Herbert L. Abrams

Original Articles:

A Case-Control Study of Regular Aspirin Use and Coronary Deaths. 35
Charles H. Hennekens, Lynne K. Karlson, and Bernard Rosner

Editorial: Aspirin and Coronary Deaths 39
William T. Friedewald

Changes in Exercise Coronary Sinus Blood Flow with Training in Patients with Angina Pectoris 41
Ronald J. Ferguson, Pierre Cote, Pierre Gauthier, and Martial G. Bourassa

Detection of Myocardial Ischemia by Regional Dysfunction During and After Rapid Pacing in Conscious Dogs. 48
Hitonobu Tomoike, Dean Franklin, and John Ross, Jr.

Coronary Arterial Spasm and Prinzmetal's Variant Form of Angina Induced by Hyperventilation and Tris-Buffer Infusion 56
Hirofumi Yasue, Masao Nagao, Shingo Omote, Akinori Takizawa, Kunihisa Miwa, and Satoru Tanaka

Left Ventricular Function Following Coronary Bypass Surgery 63
Nelson M. Wolf, Thomas H. Kreulen, Alfred A. Bove, Michael T. McDonough, Kenneth M. Kessler, Michael Strong, Gerald LeMole, and James F. Spann

The Bjork-Shiley Aortic Prosthesis: Flow Characteristics, Thrombus Formation and Tissue Overgrowth 70
Ajit P. Yoganathan, William H. Corcoran, Earl C. Harrison, and James R. Carl

Diastolic Left Ventricular Pressure-Volume and Stress-Strain Relations in Patients with Valvular Aortic Stenosis and Left Ventricular Hypertrophy 77
Kirk L. Peterson, Jack Tsuji, Allen Johnson, Jerry DiDonna, and Martin LeWinter

A Chronically Implanted System for Automatic Defibrillation in Active Conscious Dogs. Experimental Model for Treatment of Sudden Death from Ventricular Fibrillation ... 90
M. Mirowski, Morton M. Mower, Alois Langer, M. S. Heilman, and Julian Schreibman

Noninvasive Recording of His-Purkinje Activity in Man by QRS-Triggered Signal Averaging 95
Waldemar J. Wajszczuk, Mariusz J. Stopczyk, Mitchell S. Moskowitz, Ryszard J. Zochowski, Thomas Bauld, Peter L. Dabos, and Melvyn Rubenfire

Reentrant Ventricular Arrythmias in the Late Myocardial Infarction Period. 6. Effect of the Autonomic System 103
Nabil El-Sherif

Technetium-99m Stannous Pyrophosphate Imaging of Experimental Infective Endocarditis 111
Arthur L. Riba, James Downs, Mathew L. Thakur, Alexander Gottschalk, Vincent T. Andriole, and Barry L. Zaret

Pressure and Sound Correlates of the Mitral Valve Echocardiogram in Mitral Stenosis 119
Rosemarie Salerni, P. Sudhakar Reddy, M. Eugene Sherman, James D. O'Toole, Donald F. Leon, and James A. Shaver

Stroke Volume Calculated from the Mitral Valve Echogram in Patients with and Without Ventricular Dyssynergy 125
Susan Rasmussen, Betty C. Corya, Harvey Feigenbaum, Mary Jo Black, D. Eugene Lovelace, John F. Phillips, R. Joe Noble, and Suzanne B. Knoebel

Physician and Patient Exposure During Cardiac Catheterization 134
Fred G. Rueter

Visualization of the Pulmonary Arteries in Pseudotruncus by Pulmonary Vein Wedge Angiography 140
Michael R. Nihill, Charles E. Mullins, and Dan G. McNamara

Use of the Time Interval Histographic Output from Echo-Doppler to Detect Left-to-Right Atrial Shunts 147
Stanley J. Goldberg, Jose C. Areias, Silja E. C. Spitaels, and Volkert H. de Villeneuve

(Continued)

Ventricular Volume Characteristics in Infants and Children with Endocardial Cushion Defects 153
Jay M. Jarmankani, Barbara George, and John Wheller

Hemodynamic Effects of Intravenous Phentolamine In Low Output Cardiac Failure. Dose-Response Relationships 157
Mark A. Stern, Helmut K. Gohlke, Henry S. Loeb, Robert P. Croke, and Rolf M. Gunnar

Decreased Bioavailability of Digoxin Due to Hypercholesterolemic Interventions 164
Donald D. Brown, Randy P. Juhl, and Susan L. Warner, with the technical assistance of Blenda McKinney, A. A. Schrott, and Mara Schrott

Case Reports:

Takayasu's Disease in Twin Sisters. Possible Genetic Factors 173
Fujio Numano, Ichiro Isohisa, Yukio Kishi, Masataka Arita, and Hidenori Maezawa

Multiple Coronary Arterioventricular Fistulae 178
Alan G. Rose

The Development of Pulmonary Vascular Obstructive Disease After Successful Mustard Operation in Early Infancy 181
William Berman, Jr., Victor Whitman, William S. Pierce, and John A. Waldhausen

Letters to the Editor 186

News From The American Heart Association

No. 2 (August)

Editorial:

On the Interpretation of the Exercise Test 193
Arthur Selzer, Keith Cohn, and Nora Goldschlager

Original Articles:

Hemodynamic and Metabolic Response After Abrupt Withdrawal of Propranolol. 196
J. Hurley Myers and Lawrence D. Horwitz

EDITORIAL: Propranolol Withdrawal Syndrome — Why? 202
David G. Shand and Alastair J. J. Wood

Early Intraaortic Balloon Pumping for Anterior Myocardial Infarction Without Shock 204
Robert C. Leinbach, Herman K. Gold, Richard W. Harper, Mortimer J. Buckley, and W. Gerald Austen

EDITORIAL: Preservation of Ischemic Myocardium with Intraaortic Balloon Pumping: Modern Therapeutic Imperative or *Primum Non Nocere?* 211
Stephen S. Scheidt

The Effect of Ischemia on Thallium-201 Clearance from the Myocardium 215
Henry Gewirtz, Dennis O'Keefe, Gerald M. Pohost, H. W. Strauss, Joseph B. MacIlduff, and Willard M. Daggett

Long-Term Preservation of Ischemic Myocardium in the Dog by Hyaluronidase. 220
Robert A. Kloner, Eugene Braunwald, and Peter R. Maroko

Myocardial Infarct Quantification in the Dog by Single Photon Emission Computed Tomography 227
John W. Keyes, Jr., Patrick F. Leonard, Steven L. Brody, Donald J. Svetkoff, W. Leslie Rogers, and Benedict R. Lucchesi

Pressure-Flow Characteristics of the Coronary Collateral Circulation During Cardiopulmonary Bypass: Effects of Ventricular Fibrillation 233
Leonard H. Kleinman and Andrew S. Wechsler

Effect of Potassium Cardioplegia on Myocardial Ischemia and Post Arrest Ventricular Function 240
Hartzell V. Schaff, Richard Dombroff, John T. Flaherty, Bernadine H. Bulkley, Grover M. Hutchins, Richard Goldman, and Vincent L. Gott

Surgery Using Cardiopulmonary Bypass in the Elderly 250
Larry W. Stephenson, Horace MacVaugh III, and L. Henry Edmunds, Jr.

Severe Aortic Stenosis with Impaired Left Ventricular Function and Clinical Heart Failure: Results of Valve Replacement 255
Neale Smith, John H. McAnulty, and Shahbudin H. Rahimtoola

Cardiac Tamponade: Hemodynamic Observations in Man 265
P. Sudhakar Reddy, Edward I. Curtiss, James D. O'Toole, and James A. Shaver

Beneficial Effects of Hydralazine in Severe Mitral Regurgitation 273
Barry H. Greenberg, Barry M. Massie, Bruce H. Brundage, Elias H. Botvinick, William W. Parmley, and Kanu Chatterjee

Contrasting Rates of Reversal of Digoxin Toxicity by Digoxin-Specific IgG and Fab Fragments 280
Brian L. Lloyd and Thomas W. Smith

The Effect of Digitalis on Refractoriness of the Intact Canine His-Purkinje System 284
Joseph A. C. Gomes, Anthony N. Damato, Gustavus A. Bobb, and Sun H. Lau

Reentry Within the His-Purkinje System: Elucidation of Reentrant Circuit Utilizing Right Bundle Branch and His Bundle Recordings 295
Masood Akhtar, Carol Gilbert, Francis G. Wolf, and Donald H. Schmidt

Clinical and Electrophysiologic Findings in Patients with Paroxysmal Slowing of Sinus Rate and Apparent Mobitz Type II Atrioventricular Block 305
Barry Massie, Melvin M. Scheinman, Robert Peters, Jawahar Desai, David Hirschfeld and Judy O'Young

(Continued)

Dual Echocardiographic Determination of Atrial Contraction Sequence in Atrial Flutter and Other Related Atrial Arrhythmias 314
Junichi Fujii, James R. Foster, Peter G. Mills, Sally Moos, and Ernest Craige

Diagnosis of Ventricular Septal Defect by Pulsed Doppler Echocardiography — Sensitivity, Specificity and Limitations 322
James Geoffrey Stevenson, Isawu Kawabori, Terryl Dooley, and Warren G. Guntheroth

Use of Contrast Echocardiography for Evaluation of Right Ventricular Hemodynamics in the Presence of Ventricular Septal Defects 327
Gerald A. Serwer, Brenda E. Armstrong, Page A. W. Anderson, Douglas Sherman, D. Woodrow Benson, Jr., and Sam B. Edwards

Two-Dimensional Echocardiographic Assessment of Ebstein's Anomaly 336
Thomas A. Ports, Norman H. Silverman, and Nelson B. Schiller

Real-Time Cross-Sectional Echocardiographic Imaging and Measurement of the Patent Ductus Arteriosus in Infants and Children 343
David J. Sahn and Hugh D. Allen

Models of Congenital Heart Disease in Fetal Lambs 354
Noel H. Fishman, Robert B. Hof, Abraham M. Rudolph, and Michael A. Heymann

Effects of Dietary and Pharmacologic Alteration of Serum Lipids on Platelet Survival Time 365
Peter Steele and Joseph Rainwater

Cardiovascular Responses to Dynamic and Static Effort Soon After Myocardial Infarction 368
Robert F. DeBusk, Ruben Valdez, Nancy Houston, and William L. Haskell

Letters to the Editor 376

A.H.A. Committee Report 381A
Value and Safety of Diet Modification to Control Hyperlipidemia in Childhood and Adolescence — A Statement for Physicians
Ad Hoc Committee of the Steering Committee for Medical and Community Program of the American Heart Association: Charles J. Glueck, Henry C. McGill, Jr., Robert E. Shank, and Ronald M. Lauer

President's Report 386A
Planned Giving for Research Support

No. 3 (September)

The George E. Brown Memorial Lecture:

Determinants and Prediction of Transmural Myocardial Perfusion 381
Julien I. E. Hoffman

Original Articles:

Catenoid Shape of the Interventricular Septum: Possible Cause of Idiopathic Hypertrophic Subaortic Stenosis 392
Grover M. Hutchins and Bernadine H. Bulkley

EDITORIAL: Myocardial Fiber Disarray and Ventricular Septal Hypertrophy in Asymmetrical Hypertrophy of the Heart 398
E. D. Wigle and M. D. Silver

Electrocardiographic Findings in Patients with Obstructive and Nonobstructive Hypertrophic Cardiomyopathy 402
Daniel D. Savage, Stuart F. Seides, Chester E. Clark, Walter L. Henry, Barry J. Maron, Felipe C. Robinson, and Stephen E. Epstein

Limitations of Routine Long-Term Ambulatory Electrocardiographic Monitoring to Assess Ventricular Ectopic Frequency 408
Joel Morganroth, Eric L. Michelson, Leonard N. Horowitz, Mark E. Josephson, Alan S. Pearlman, and W. Bruce Dunkman

Determinants of Atrioventricular Reentrant Paroxysmal Tachycardia in Patients with Wolff-Parkinson-White Syndrome 415
Pablo Denes, Delon Wu, Fernando Amat-y-Leon, Ramesh Dhingra, Robert Bauernfeind, Richard Kehoe, and Kenneth M. Rosen

Effects of Self-Induced Starvation on Cardiac Size and Function in Anorexia Nervosa 425
John S. Gottdiener, Howard A. Gross, Walter L. Henry, Jeffrey S. Borer, and Michael H. Ebert

Effects of a Natural Volume Overload State (Pregnancy) on Left Ventricular Performance in Normal Human Subjects 434
Richard Katz, Joel S. Karliner, and Robert Resnik

Systemic and Regional Hemodynamics in Low, Normal and High Cardiac Borderline Hypertension 441
Franz H. Messerli, Jose G. R. De Carvalho, Barbara Christie, and Edward D. Frohlich

Beneficial Effect of Salbutamol on Cardiac Function in Severe Congestive Cardiomyopathy. Effect on Systolic and Diastolic Function of the Left Ventricle 449
Bim Sharma and J. F. Goodwin

Aortic Input Impedance in Heart Failure 460
Carl J. Pepine, Wilmer W. Nichols, and C. Richard Conti

Comparative Systemic and Regional Hemodynamic Effects of Dopamine and Dobutamine in Patients with Cardiomyopathic Heart Failure 466
Carl V. Leier, Paul T. Heban, Patricia Huss, Charles A. Bush, and Richard P. Lewis

(Continued)

The Effect of Exercise and Atrial Pacing on Left Ventricular Volume and Contractility in Patients with Innervated and Denervated Hearts 476
Peter R. McLaughlin, Jay H. Kleiman, Randolph P. Martin, Paul W. Doherty, Bruce Reitz, Edward B. Stinson, George T. Daughters, Neil B. Ingels, and Edwin L. Alderman

The Effect of Free Fatty Acids on Myocardial Oxygen Consumption During Atrial Pacing and Catecholamine Infusion in Man 484
Svein Simonsen and John K. Kjekshus

Relation Between Left Coronary Artery Stenosis and Regional Left Ventricular Function ... 491
Martin G. St. John Sutton, Robert L. Frye, Hugh C. Smith, James H. Chesebro, and Erik L. Ritman

Computed Tomography for Localization and Sizing of Experimental Acute Myocardial Infarction 497
William R. Gray, Jr., Maximilian Buja, Herbert K. Hagler, Robert W. Parkey, and James T. Willerson

A Multivariate Approach for Interpreting Treadmill Exercise Tests in Coronary Artery Disease 505
Julian L. Berman, Joshua Wynne, and Peter F. Cohn

Alterations in Calcium Levels of Coronary Sinus Blood During Coronary Arteriography in the Dog 512
Charles B. Higgins and Walter Schmidt

Identification and Description of Separate Mechanisms for Two Components of Renografin Cardiotoxicity 520
Kenneth A. Popio, Andrew M. Ross, John M. Oravec, and James T. Ingram

Echocardiography of Left Ventricular Masses .. 528
Thomas A. Ports, John Cogan, Nelson B. Schiller, and Elliot Rapaport

Secular Trends in Ischemic Heart Disease and Stroke Mortality from 1970 to 1976 in Spanish-surnamed and Other White Individuals in Bexar County, Texas 537
Michael P. Stern and Sharon Parten Gaskill

Effects of Indomethacin on the Vascular Abnormalities of Bartter's Syndrome 544
Carl J. Richards, Allyn L. Mark, Dianna E. Van Orden, and George J. Kaloyanides

Complete Common Atrioventricular Canal in Infancy — Surgical Repair and Postoperative Hemodynamics 550
Walter Culpepper, Jack Kolff, Chung-Yuan Lin, Dolores Vitullo, John Lamberti, Rene A. Arcilla, and Robert Replogle

The Morphologic Spectrum of Double Outlet Left Ventricle and Its Surgical Significance 558
Saroja Bharati, Maurice Lev, Robert Stewart, Hugh A. McAllister, and John W. Kirklin

Case Report:

Fulminant Beriberi Heart Disease with Lactic Acidosis: Presentation of a Case with Evaluation of Left Ventricular Function and Review of Pathophysiologic Mechanisms .. 566
Michael Attas, Henry G. Hanley, Daniel Stultz, Michael R. Jones, and Russell G. McAllister

Eric L. Michelson, Joel Morganroth, Joseph F. Spear, John A. Kastor, and Mark E. Josephson

Abolition and Modification of Reentry Within the His-Purkinje System by Procainamide in Man. 1010
C. Pratap Reddy and Milton Lynch

Disparate Electrophysiological Alterations Accompanying Dysrhythmia Due to Coronary Occlusion and Reperfusion in the Cat. 1023
Patricia A. Penkoske, Burton E. Sobel, and Peter B. Corr

Multicentric Origin of the Atrial Depolarization Wave — The Pacemaker Complex. Relation to Dynamics of Atrial Conduction, P-Wave Changes and Heart Rate Control. 1036
John P. Boineau, Richard B. Schuessler, Charles R. Mooney, Anita C. Wylds, Carey B. Miller, Roger D. Hudson, Joseph M. Borremans, and Charles W. Brockus

Echocardiographic Evaluation of Intracardiac Pacing Catheters: M-Mode and Two-Dimensional Studies 1049
William C. Reeves, Navin C. Nanda, and S. Serge Barold

Differentiation of Posterior Myocardial Infarction from Right Ventricular Hypertophy and Normal Anterior Loop by Echocardiography. 1057
Neil E. Kramer, Kamal K. Chawla, Ramesh Patel, Mushtaq Khan, Thomas Mayer, and W. D. Towne

Physiologic Correlates and Echocardiographic Pulmonary Valve Motion in Diastole. 1064
David J. Pocoski and Pravin M. Shah, with the technical assistance of Linda J. Sylvester

Recommendations Regarding Quantitation in M-Mode Echocardiography: Results of a Survey of Echocardiographic Measurements. 1072
David J. Sahn, Anthony DeMaria, Joseph Kisslo, and Arthur Weyman — the Committee on M-Mode Standardization of the American Society of Echocardiography

The Echocardiographic Profile of Patients After Mustard's Operation. 1083
Norman H. Silverman, Maurice Payot, Paul Stanger, and Abraham M. Rudolph

Magnification Pulmonary Wedge Angiography in the Evaluation of Children with Congenital Heart Disease and Pulmonary Hypertension. 1094
Michael R. Nihill and Dan G. McNamara

(Continued)

Lung Biopsy in Congenital Heart Disease: A Morphometric Approach to Pulmonary Vascular Disease. 1107
Marlene Rabinovitch, Sheila G. Haworth, Aldo R. Castaneda, Alexander S. Nadas, and Lynne M. Reid

Systolic Time Intervals in Children: Normal Standards for Clinical Use. 1123
Angel Cantor, Kenneth L. Wanderman, Tzipora Karolevitch, Ilya Ovsyshcher, and Mosche Gueron, with the assistance of Gabriel Loutaty

Detection of Serum Cardiac Myosin Light Chains in Acute Experimental Myocardial Infarction: Radioimmunoassay of Cardiac Myosin Light Chains. 1130
Ban An Khaw, Herman K. Gold, John T. Fallon, and Edgar Haber

Early Imaging of Experimental Myocardial Infarction by Intracoronary Administration of ^{131}I-Labelled Anticardiac Myosin (Fab')$_2$ Fragments. 1137
Ban An Khaw, Herman K. Gold, Robert C. Leinbach, John T. Fallon, William Strauss, Gerald M. Pohost, and Edgar Haber

Myocardial Infarction Size from Serial CPK: Variability of CPK Serum Ratio with Size and Model of Infarction. 1143
John A. Cairns, Eleftheria Missirlis, and Ernest L. Fallen

Relationship of Regional Myocardial Perfusion to Segmental Wall Motion. A Physiologic Basis for Understanding the Presence and Reversibility of Asynergy. 1154
Barry M. Massie, Elias H. Botvinick, Bruce H. Brundage, Barry Greenberg, David Shames, and Harris Gelberg

Emergency Revascularization for Unstable Angina 1163
Leonard A. R. Golding, Floyd D. Loop, William C. Sheldon, Paul C. Taylor, Laurence K. Groves, and Delos M. Cosgrove

Ventriculographic Features Predictive of Surgical Outcome for Left Ventricular Aneurysm. .. 1167
David P. Kapelanski, Jafar Al-Sadir, John J. Lamberti and Constantine E. Anagnostopoulos

Effect of Preoperative Ejection Fraction on Survival and Hemodynamic Improvement Following Aortic Valve Replacement. 1175
James D. O'Toole, Edward A. Geiser, P. Sudhakar Reddy, Edward I. Curtiss, and Roy M. Landfair

Asymptomatic Coronary Artery Disease: Angiographic Assessment of Diabetics Evaluated for Renal Transplantation. 1184
Larry A. Weinrauch, John A. D'Elia, Robert W. Healy, A Richard Christlieb, and O. Stevens Leland, Jr.

A Conductive Catheter to Improve Patient Safety During Cadiac Catheterization. 1190
Martin J. Lipton, Allen K. Ream, and Bruce H. Hyndman

Relationship Between Plasma Concentration and Dose of Digoxin in Patients With and Without Renal Impairment. 1196
Robert D. Okada, W. David Hager, Penelope E. Graves, Michael Mayersohn, Donald G. Perrier, and Frank I. Marcus

Cardiac Sarcoid: A Clinicopathologic Study of 84 Unselected Patients with Systemic Sarcoidosis 1204
Kenneth J. Silverman, Grover M. Hutchins, and Bernadine H. Bulkley

Circulation

VOLUMES 57 AND 58
January-December, 1978

CARDIOVASCULAR SURGERY 1977

No. 1 (September)

Low Compliance and Arterial Graft Occlusion
Iain G. Kidson, and William M. Abbott I-1

Noninvasive Evaluation of Asymptomatic Carotid Bruits
David C. Brewster, William M. Abbott, R. Clement Darling, Nancy C. Reidy, and Jeffrey K. Raines I-5

Ultrastructure of Hancock Porcine Valvular Heterografts. Pre- and Post-Implantation Changes
Victor J. Ferrans, Thomas L. Spray, Margaret E. Billingham, and William C. Roberts I-10

Systemic and Pulmonary Effects of Nitroprusside During Mitral Valve Replacement in Patients with Mitral Regurgitation
Demetrios G. Lappas, Mitchio Ohtaka, Nabil R. Fahmy, and Mortimer J. Buckley I-18

Intraoperative Intracardiac Echocardiography During Left Ventriculomyotomy and Myectomy for Hypertropic Subaortic Stenosis
Donald C. Syracuse, Vincent A. Gaudiani, David G. Kastl, Walter L. Henry, and Andrew G. Morrow I-23

Hemodynamic Studies After DeVega's Tricuspid Annuloplasty
Klaus Haerten, Ludger Seipel, Franz Loogen, and Jörg Herzer I-28

Hemodynamic Evaluation of the Hancock-Modified Orifice Bioprosthesis in The Aortic Position
Frederick H. Levine, Mortimer J. Buckley, and W. Gerald Austen I-33

Mitral Valve — The Third Time Around
Donald J. Magilligan, Jr., Conrad R. Lam, Joseph W. Lewis, Jr., and Julio C. Davila I-36

Quantification of Myocardial Injury During Coronary Artery Bypass Graft
Richard J. Gray, William E. Shell, Carolyn Conklin, William Ganz, Prediman K. Shah, Alfonso T. Miyamoto, Jack M. Matloff, and H.J.C. Swan I-38

Hypertension Following Coronary Artery Bypass Graft Surgery: Comparison of Hemodynamic Responses to Nitroprusside, Phentolamine, and Converting Enzyme Inhibitor
Arthur J. Roberts, Andreas P. Niarchos, Valavanur A. Subramanian, Ronald M. Abel, Eddie L. Hoover, John C. McCabe, David B. Case, John H. Laragh, and William A. Gray, Jr. I-43

Left Ventricular Aneurysmectomy in Patients with Single vs Multivessel Coronary Artery Disease
William J. Rogers, Albert Oberman, and Nicholas T. Kouchoukos I-50

(Continued)

Potassium Cardioplegia: Early Assessment by Radionuclide Ventriculography
R. J. Ellis, M. Born, T. Feit, and P. A. Ebert I-57

Changes in Left Ventricular Segmental Wall Motion Following Randomization to Medicine or Surgery in Patients with Unstable Angina
Marshall F. Priest, George C. Curry, L. Richard Smith, William J. Rogers, John A. Mantle, Charles E. Rackley, Nicholas T. Kouchoukos, and Richard O. Russell, Jr. I-62

Management of Acute Myocardial Ischemia with Intraaortic Balloon Pumping and Coronary Bypass Surgery
Frederick H. Levine, Herman K. Gold, Robert C. Leinbach, Willard M. Daggett, W. Gerald Austen, and Mortimer J. Buckley I-69

Blalock-Taussig Anastomosis: The Preferred Shunt in Infants and Newborns
John P. Marbarger, Jr., Joseph G. Sandza, Jr., Alexis F. Hartmann, Jr., and Clarence S. Weldon I-73

Late Results of the Subclavian Flap Procedure in Infants with Coarctation of the Thoracic Aorta
William S. Pierce, John A. Waldhausen, William Berman, Jr., and Victor Whitman I-78

Physiological Approach to Surgery for Tricuspid Atresia
Frederick O. Bowman, Jr., James R. Malm, Constance J. Hayes, and Welton M. Gersony I-83

Ebstein's Anomaly of the Left-Sided Tricuspid Valve: Pathological Anatomy of the Valvular Malformation
Kenneth R. Anderson, Gordon K. Danielson, Dwight C. McGoon, and O. T. Lie I-87

Myocardial Revascularization in Patients with Multivessel Coronary Artery Disease and Minimal Angina Pectoris
Joshua Wynne, Lawrence H. Cohn, John J. Collins, Jr., and Peter F. Cohn I-92

Long-Term Patency of Saphenous Veins for Coronary Bypass Grafting
Nicholas T. Kouchoukos, Robert B. Karp, Albert Oberman, R. O. Russell, Jr., Harold W. Alison, and John H. Holt, Jr. I-96

Progression of Obstructive Coronary Artery Disease 5 to 7 Years After Aortocoronary Bypass Surgery
Martial G. Bourassa, Jacques Lespérance, Frederico Corbara, Jacques Saltiel, and Lucien Campeau I-100

Cardioplegia and Myocardial Preservation During Cardiopulmonary Bypass
Richard M. Engleman, Sidney Levitsky, Michael J. O'Donoghue, and Jackson Auvil I-107

Cardioplegic Solutions for Myocardial Preservation: Analysis of Hypothermic Arrest, Potassium Arrest, and Procaine Arrest
Bradley J. Harlan, Donald Ross, Quentin Macmanus, Ronald Knight, John Luber, and Albert Starr I-114

Effects of Verapamil on Myocardial Tolerance to Ischemic Arrest: Comparison to Potassium Arrest
Celeste Robb-Nicholson, William D. Currie, and Andrew S. Wechsler I-119

Clinical Experience with Intraaortic Balloon Pump Support in 728 Patients
M. Terry McEnany, Harold R. Kay, Mortimer J. Buckley, Willard M. Daggett, A. John Erdmann, Eldred D. Mundth, R. Subba Rao, Jacques DeToeuf, and W. Gerald Austen I-124

Prolonged Mechanical Support of the Left Ventricle
William S. Pierce, James H. Donachy, Donald L. Landis, John A. Brighton, Gerson Rosenberg, Joseph J. Migliore, G. Allen Prophet, William J. White, and John A. Waldhausen I-133

Perioperative Infarction: The Effects of Cardiopulmonary Bypass on Collateral Circulation in an Acute Canine Model
Alfonso Tadaomi M. Miyamoto, Luciann Robinson, Jack M. Matloff, and James R. Norman I-147

Hemodilution Causes Decreased Compliance in Puppies
Constantine Mavroudis, and Paul A. Ebert I-155

Hemodynamic Characteristics of the Composite Strut Ball Valve Prostheses (Starr-Edwards Track Valves) in Patients on Anticoagulants
John H. McAnulty, Mark Morton, Shahbudin H. Rahimtoola, Frank E. Kloster, Naina Ahuja, and Albert E. Starr I-159

(Continued)

Pulsatile Flow Characteristics of Aortic Valve Porcine Heterografts in Man
L. G. Christie, Jr., W. W. Nichols, C. J. Pepine, R. C. Curry, Jr., and C. R. Conti I-162

Effect of Surgery on Ventricular Tachyarrhythmias Associated with Coronary Arterial Occlusive Disease
Imad F. Tabry, Alexander S. Geha, Graeme L. Hammond, and Arthur E. Baue I-166

Aortocoronary Saphenous Vein Bypass Graft Changes 5 to 7 Years after Surgery
Lucien Campeau, Jacques Lespérance, Frederico Corbara, Jacques Hermann, Claude M. Grondin, and Martial G. Bourassa I-170

Left Ventricular Function During Intra-aortic Balloon Pumping Assessed by Multigated Cardiac Blood Pool Imaging
Allen B. Nichols, Gerald M. Pohost, Herman K. Gold, Robert C. Leinbach, George A. Beller, Kenneth A. McKusick, H. William Strauss, and Mortimer J. Buckley I-176

Effects of Calcium Administration During Post-Ischemic Reperfusion on Myocardial Contractility, Stiffness, Edema, and Ultrastructure
Thomas J. Bixler, John T. Flaherty, Timothy J. Gardner, Bernadine H. Bulkley, Hartzell V. Schaff, and Vincent L. Gott I-184

Six-year Clinical and Angiographic Follow-Up of Patients with Previously Documented Complete Revascularization
Edward W. Robert, Diana F. Guthaner, Lewis Wexler, and Edwin L. Alderman I-194

Advantages of Intermittent Blood Cardioplegia Over Intermittent Ischemia During Prolonged Hypothermic Aortic Clamping
David M. Follette, David L. Steed, Robert Foglia, Klaus Fey, and Gerald D. Buckberg I-200

Long-Term Hemodynamic and Electrocardiographic Assessment Following Operative Repair of Tetralogy of Fallot
Douglas R. Rosing, Jeffrey S. Borer, Kenneth M. Kent, Barry J. Maron, Stuart F. Seides, Andrew G. Morrow, and Stephen E. Epstein I-209

Cardiac Metabolism and Performance Following Cold Potassium Cardioplegia
Richard D. Weisel, Irving H. Lipton, Robert N. Lyall, and Ronald J. Baird I-217

Resection of the Aortic Arch Using Deep Hypothermia and Temporary Circulatory Arrest
David A. Ott, O. Howard Frazier, and Denton A. Cooley I-227

ABSTRACTS FOR THE 51ST SCIENTIFIC SESSIONS

Scientific Sessions for Nurses

32nd Annual Meeting, Council on Arteriosclerosis —
American Society for the Study of Arteriosclerosis
3rd National Conference on Thrombosis
and Hemostasis

No. 2 (October)

Author and Subject Indexes to this supplement are included in the supplement.

Author Index to ABSTRACTS, AHA 51st Scientific Sessions, Supplement II, October 1978, is included in that issue.

SUPPLEMENTS

TO

CIRCULATION

VOLUME 58 JULY-DECEMBER, 1978

Subject Index to ABSTRACTS, AHA 51st Scientific Sessions, Supplement II, October 1978, is included in that issue.

CARDIOVASCULAR SURGERY 1977

SUPPLEMENT SUBJECT INDEX

A

Anastomosis
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Aneurysm
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Resection of the aortic arch using deep hypothermia and temporary circulatory arrest, I-227
Angina pectoris
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Clinical experience with intraaortic balloon pump support in 728 patients, I-124
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Angiography
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Annuloplasty
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Anticoagulants
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Aorta
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Aortocoronary saphenous vein bypass graft changes 5 to 7 years after surgery, I-170
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Resection of the aortic arch using deep hypothermia and temporary circulatory arrest, I-227
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Aortocoronary bypass
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Arrhythmia
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Arterial atresia
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Artery, coronary
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Quantification of myocardial injury during coronary artery bypass graft, I-38
Artery, femoral
Low compliance and arterial graft occlusion, I-1
Artery, left anterior descending
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Artery, pulmonary
Physiological approach to surgery for tricuspid atresia, I-83
Artery, subclavian
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Asymptomatic carotid bruit
Noninvasive evaluation of asymptomatic carotid bruits, I-5

Atherosclerosis
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Atresia, tricuspid
Physiological approach to surgery for tricuspid atresia, I-83
Atrioventricular orifice
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87

B

Balloon pumping
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Clinical experience with intraaortic balloon pump support in 728 patients, I-124
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Prolonged mechanical support of the left ventricle, I-133
Bioprosthesis
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Björk-Shiley valve
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Blalock-Taussig shunt
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Blood flow
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Hemodilution causes decreased compliance in puppies, I-155
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Prolonged mechanical support of the left ventricle, I-133
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Resection of the aortic arch using deep hypothermia and temporary circulatory arrest, I-227
Blood infusion
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Blood oxygen
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Blood pool imaging
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Blood pressure
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Physiological approach to surgery for tricuspid atresia, I-83
Bruit
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Bypass surgery
Aortocoronary saphenous vein bypass graft changes 5 to 7 years after surgery, I-170
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Clinical experience with intraaortic balloon pump support in 728 patients, I-124
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Hemodilution causes decreased compliance in puppies, I-155
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Long-term patency of saphenous veins for coronary bypass grafting, I-96
Low compliance and arterial graft occlusion, I-1
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Prolonged mechanical support of the left ventricle, I-133
Quantification of myocardial injury during coronary artery bypass graft, I-38
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194

C

Calcium
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Calf studies
Prolonged mechanical support of the left ventricle, I-133
Cardiac arrest
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Prolonged mechanical support of the left ventricle, I-133
Resection of the aortic arch using deep hypothermia and temporary circulatory arrest, I-227
Cardiac catheterization
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Cardioplegia, *see* Cardiac arrest
Carotid audiofrequency analysis (CAA)
Noninvasive evaluation of asymptomatic carotid bruits, I-5

Carpentier-Edwards valve
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Citrate solution
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Clamping
Advantages of intermittent blood cardioplegia over intermittent schemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Coarctation of thoracic aorta
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Collateral circulation index (CCI)
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Commissurotomy
Mitral valve — the third time around, I-36
Compliance, myocardial
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Hemodilution causes decreased compliance in puppies, I-155
Composite strut ball valve prosthesis
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Congenital disorder
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Hemodilution causes decreased compliance in puppies, I-155
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Physiological approach to surgery for tricuspid atresia, I-83
Contractility
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Converting enzyme inhibitor
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Coronary artery disease
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Clinical experience with intraaortic balloon pump support in 728 patients, I-124
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Progression of obstructive coronary artery disease 5 to 7 years after aortocoronary bypass surgery, I-100
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Coronary perfusion
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Coronary sinus
Cardiac metabolism and performance following cold potassium cardioplegia, I-217

D

Dacron graft
Low compliance and arterial graft occlusion, I-1
De Vega's tricuspid annuloplasty
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Dog studies
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Hemodilution causes decreased compliance in puppies, I-155
Low compliance and arterial graft occlusion, I-1
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Doppler analysis
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Noninvasive evaluation of asymptomatic carotid bruits, I-5

E

Ebstein's anomaly
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Echocardiography
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Echoprobe
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Ectopy
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Electrocardiography
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Endarterectomy
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Enzyme inhibitor
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Exercise testing
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209

F

Flap, subclavian
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78

Fontan's approach
Physiological approach to surgery for tricuspid atresia, I-83

G

Glutaraldehyde-fixed porcine graft
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Graft
Aortocoronary saphenous vein bypass graft changes 5 to 7 years after surgery, I-170
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Long-term patency of saphenous veins for coronary bypass grafting, I-96
Low compliance and arterial graft occlusion, I-1
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Quantification of myocardial injury during coronary artery bypass graft, I-38
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10

H

Hancock porcine valve
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Heart failure
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Hemodilution
Hemodilution causes decreased compliance in puppies, I-155
Hemodynamic evaluation
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Horner's syndrome
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Hypertension
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Hypertrophy
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Hypothermia
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Quantification of myocardial injury during coronary artery bypass graft, I-38
Resection of the aortic arch using deep hypothermia and temporary circulatory arrest, I-227
Hypothermic cardioplegia
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184

I

Idiopathic hypertrophic subaortic stenosis
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Infant
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Interventricular septum
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Intraoperative echocardiography
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Ischemia
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Left ventricular function during intraaortic balloon pumping

assessed by multigated cardiac blood pool imaging, I-176
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69

L

Lactate production
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Left atrium
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Left ventricle
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Prolonged mechanical support of the left ventricle, I-133

M

Metabolism, cardiac
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Prolonged mechanical support of the left ventricle, I-133
Mitral commissurotomy
Mitral valve — the third time around, I-36
Mitral regurgitation
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Multivessel coronary artery disease
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Myectomy
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Myocardial edema
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Hemodilution causes decreased compliance in puppies, I-155
Myocardial infarction
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Myocardial injury
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Quantification of myocardial injury during coronary artery bypass graft, I-38
Myocardial oxygen supply
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Myocardial perfusion
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Myocardial preservation
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Perioperative infarction: the effects of cardiopulmonary bypass on collateral circulation in an acute canine model, I-147
Myocardial revascularization
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Management of acute myocardial ischemia with intraaortic balloon pumping and coronary bypass surgery, I-69
Myocardial revascularization in patients with multivessel coronary artery disease and minimal angina pectoris, I-92
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Myocardial stiffness
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184
Myocardial water content
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Effects of calcium administration during post-ischemic reperfusion on myocardial contractility, stiffness, edema, and ultrastructure, I-184

N

Newborn
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Hemodilution causes decreased compliance in puppies, I-155
Nitroprusside
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43

Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Noninvasive cerebrovascular evaluation
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Normothermic cardioplegia
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107

O

Occlusion
Aortocoronary saphenous vein bypass graft changes 5 to 7 years after surgery, I-170
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Low compliance and arterial graft occlusion, I-1
Ocular pneumoplethysmography (OPPG)
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Orifice bioprosthesis
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33

P

Patency, vein
Long-term patency of saphenous veins for coronary bypass grafting, I-96
Phentolamine
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Phosphate, high-energy
Advantages of intermittent blood cardioplegia over intermittent ischemia during prolonged hypothermic aortic clamping, I-200
Pig studies
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Polytetrafluoroethylene (PTFE)
Low compliance and arterial graft occlusion, I-1
Potassium cardioplegia
Cardiac metabolism and performance following cold potassium cardioplegia, I-217
Cardioplegia and myocardial preservation during cardiopulmonary bypass, I-107
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Pulmonary circulation
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Pulmonary oligemia
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Pulmonary vascular resistance
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Pump system
Prolonged mechanical support of the left ventricle, I-133
Pumping, *see* Balloon pumping

R

Radionuclide scanning
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Rat studies
Cardioplegic solutions for myocardial preservation: analysis of hypothermic arrest, potassium arrest, and procaine arrest, I-114
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119
Regurgitation, mitral
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Right atrium
Physiological approach to surgery for tricuspid atresia, I-83
Right ventricle
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209

S

Segmental wall motion
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Septum, thickness
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Shunt
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Physiological approach to surgery for tricuspid atresia, I-83
Single vessel coronary artery disease
Left ventricular aneurysmectomy in patients with single vs multivessel coronary artery disease, I-50
Sodium nitroprusside
Hypertension following coronary artery bypass graft surgery: comparison of hemodynamic responses to nitroprusside, phentolamine, and converting enzyme inhibitor, I-43
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Starr-Edwards track valve
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Stenosis
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Noninvasive evaluation of asymptomatic carotid bruits, I-5
Six-year clinical and angiographic follow-up of patients with previously documented complete revascularization, I-194
Stenosis, hypertrophic subaortic
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Stenosis, tricuspid
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Physiological approach to surgery for tricuspid atresia, I-83
Subclavian artery flap
Late results of the subclavian flap procedure in infants with coarctation of the thoracic aorta, I-78
Systemic vascular resistance
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18

T

Tachyarrhythmia
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166

Tachycardia
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Taussig-Bing syndrome
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Technetium-99m pyrophosphate
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Tetralogy of Fallot
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Transducer, ultrasound
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Transposition of great arteries
Blalock-Taussig anastomosis: the preferred shunt in infants and newborns, I-73
Tricuspid atresia
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Physiological approach to surgery for tricuspid atresia, I-83
Tricuspid valve
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87

U

Ultrasound
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23

V

Valve
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Physiological approach to surgery for tricuspid atresia, I-83
Prolonged mechanical support of the left ventricle, I-133
Valve, aortic
Hemodynamic evaluation of the Hancock-modified orifice bioprosthesis in the aortic position, I-33
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Pulsatile flow characteristics of aortic valve porcine heterografts in man, I-162
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Valve, mitral
Hemodynamic characteristics of the composite strut ball valve prostheses (Starr-Edwards track valves) in patients on anticoagulants, I-159
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Mitral valve — the third time around, I-36
Systemic and pulmonary effects of nitroprusside during mitral valve replacement in patients with mitral regurgitation, I-18
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Valve, tricuspid
Ebstein's anomaly of the left-sided tricuspid valve: pathological anatomy of the valvular malformation, I-87
Hemodynamic studies after DeVega's tricuspid annuloplasty, I-28
Mitral valve — the third time around, I-36
Ultrastructure of Hancock porcine valvular heterografts. Pre- and post-implantation changes, I-10
Vein graft
Low compliance and arterial graft occlusion, I-1
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Vein, saphenous
Aortocoronary saphenous vein bypass graft changes 5 to 7 years after surgery, I-170
Long-term patency of saphenous veins for coronary bypass grafting, I-96
Vena cava shunt
Physiological approach to surgery for tricuspid atresia, I-83
Ventricle
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Ventricular premature beats
Long-term hemodynamic and electrocardiographic assessment following operative repair of tetralogy of Fallot, I-209
Ventricular tachyarrhythmia
Effect of surgery on ventricular tachyarrhythmias associated with coronary arterial occlusive disease, I-166
Ventriculography
Potassium cardioplegia: early assessment by radionuclide ventriculography, I-57
Ventriculomyotomy
Intraoperative intracardiac echocardiography during left ventriculomyotomy and myectomy for hypertropic subaortic stenosis, I-23
Verapamil
Effects of Verapamil on myocardial tolerance to ischemic arrest: comparison to potassium arrest, I-119

W

Wall dynamics
Changes in left ventricular segmental wall motion following randomization to medicine or surgery in patients with unstable angina, I-62
Left ventricular function during intraaortic balloon pumping assessed by multigated cardiac blood pool imaging, I-176
